

## Instructions: how to make a Nomadic Monument for Gaza

- 1- An area of 18 meters long, 8 meters wide, and 3 meters high is required. If your space is smaller, you can also make a smaller version of the monument.
- 2- 2- Study the drawing. Cut the components from sheet material, at least 18 mm thick. If this is not available, assemble them from scrap wood or other materials you can find.
- 3- 3- Screw or glue the components together to form a column. Make 42 columns.
- 4- 4- Mark the number of victims on the inside of the columns with small stripes: one stripe for each victim. For current information on the number of victims, see:  
[https://www.pcbs.gov.ps/site/lang\\_en/1405/default.aspx?lang=en](https://www.pcbs.gov.ps/site/lang_en/1405/default.aspx?lang=en).
- 5- 5- Choose a familiar map from your own city, town, or surrounding area and draw it at a scale of 1:3000. This map will be placed underneath the monument, so that it matches the scale and outline of Gaza. You can draw the map on the floor. You can also print or paint it on (strips of) carpet, wood, or vinyl. 6- Place the 42 pillars on the map of your area. Arrange them so that the pillars together follow the contours of the Gaza Strip.
- 6- 7- Weigh down the base of the pillars with a material of your choice, such as bricks, sandbags, or jerrycans of water.
- 7- 8- Develop a ritual: place the new victims on the pillars at a fixed time every day. Involve as many people as possible in your Nomadic Monument for Gaza.
- 8- 9- Take photos of your monument and send them to [info@monumentforgaza.org](mailto:info@monumentforgaza.org), so they can be posted on the website. For social media posts, please choose #monumentforgaza. Would you like to keep us informed of further responses and initiatives? Thank you
